SPORTS

Unparalleled Air & Surface Disinfection for the Sports World & Fitness Industry: airPHX vs Other Technologies

Discover the Disinfecting Power of airPHX. Total Environment Disinfection. Nothing Else Comes Close!

Compare airPHX Technology with other popular cleaning and disinfecting options. You'll find that none compare with the disinfecting power of airPHX. You will have a safer and healthier space – with the flip of a switch. Say goodbye to the things that plague your fitness facility (in the air and on surfaces): coronavirus, norovirus, rhinovirus, influenza, hepatitis, H1N1, bacteria, mRSA, C.Diff, mold, e.COLI, athlete's foot fungus, staph, odors, and more.

Don't be fooled by products using UV-C, ionizer technology and/or photocatalytic oxidation claiming "reductions of 99.9% of pathogens" in controlled laboratory settings. That is easy! airPHX delivers its results in large treatment areas where pathogens are constantly being introduced into the environment. The competition does not!

The Power of airPHX:

Disinfecting Techniques on the Market Today

Discover the Disinfecting Power of airPHX. Total Environment Disinfection. Nothing Else Comes Close!

Tired of expensive, time-consuming and limited disinfection solutions for your athletic facility? Learn how airPHX Technology can save valuable time and money – plus give you peace of mind that you are providing a safe, clean, and healthy environment for your athletes, members, clients, and staff. Eliminating viruses, bacteria and odor from your space just got a lot easier with airPHX Technology.

airPHX:

- Treats air and ALL surfaces
- Easy to install
- Easy to operate (flip a switch)
- Inexpensive to power
- Organic No chemicals
- Continuous treatment
- Scalable

MANUAL CLEANING: Chemicals and Disinfectants

- Operationally intensive
- No air treatment
- Leaves room for error
- Harsh/chemical smell
- Skin irritant

FILTERING:

- Captures only a fraction of pathogens (due to their size)
- Intensive maintenance
- No surface treatment

FOGGING:

Ozone/Ion Generators Sterilizing Mists

- Limited use by Pro and College programs
- Corrosive
- Respiratory irritant
- Limited penetration
- Cumbersome set-up
- Space must be unoccupied
- Expensive to operate

UV LIGHTS:

- Only effective with direct line-of-sight
- Expensive
- Dissipates with distance
- Cumbersome set-up
- Space must be unoccupied
- No air treatment

airPHX does not meet California requirements; cannot be shipped to CA. Certification under California Air Resources Board Regulation is pending
